Gentlemen

Enclosed is the treatability test report for the Chemically Enhanced Steam Stripping Phase I test work conducted at Los Alamos The transmittal of this report is partial fulfillment of the November 12 1994 milestone for the Site Wide Treatability Studies program

The objective of the study focused on the removal of plutonium and americium from selected soil samples at Rocky Flats The test work was carried out during the summer and fall of 1994 Based on the results of this test work alternative leaching solutions have been identified which provided promising results for the removal of Pu and Am Phase II of this project is planned to further investigate the use of these solutions in the removal of Pu and AM

DOE requests that you acknowledge the receipt of this report prior to February 17 1995 If you have any questions please contact Norma Castaneda at extension 4226

Sincerely

Steven W Slaten
IAG Project Coordinator
